

# Reality Check (Song 2)

(Chorus)

Reality check this life game ain't a blank check  
Y'all been looking for some things that you can't get  
Without putting in work: Blood, Tears, Sweat  
Everybody on your mark get set

Reality check the rap game ain't a blank check  
Y'all been looking for them things that you can't get  
You ain't willing to sweat  
Stay chilling your desire to rise, won't play any effect

Verse 1

Check one if you want a job well done  
You got to be in it for the long haul son  
Check two dreams won't easily brought live  
Without action the drive strive to attain your heart's pursuit  
Check three if you really want to emcee  
Learn to love the art before the money  
Check four opportunities pass like wind on a branch  
So choose the right door or you won't have the slimmest of chance  
Check five develop a rhythm to live by  
Otherwise you might miss your flight when time flies  
Check six now feel the weight of regret for all you've missed  
Life sailed on by desires caught in a mix  
Check seven for second best you can't be settling  
There is always a new level of excellence keep wrestling  
Check eight if you wanna have effect that penetrates  
It takes devotion faith hope and sacrifice you generate

(Chorus x2)

Every Moment is life and death  
Every moment is a test to see if there is any substance left  
Like you heard it on life and depth  
This is step by step, breath by breath  
Ready set every day is a fresh start  
And living is the art getting written on your heart  
And wishing on a star ain't gonna get ya very far

But doing what you can from right where you are  
With what it is you have that sounds like a plan  
First you contract before you expand  
You gotta know, you gotta understand  
That it is not given to man beforehand  
To know every turn in the journey the learning curves

With what it is you have that sounds like a plan  
 First you contract before you expand  
 You gotta know, you gotta understand  
 That it is not given to man beforehand  
 To know every turn in the journey the learning curves  
 And swerves on the road  
 What times to merge and what times to go  
 In a direction never gone in before, yo

(Chorus x3)

Dropped sober when point blank faced with the truth  
 It'll take more effort and overcoming of angst than I knew  
 Just to make it through another day one of my biggest regrets  
 When I choose to lose sight of purpose in my days to each moment is precious  
 I could walk through lethargically and in the end let nothing be gained  
 But more pain watch life pass with cars through an intersection  
 Drinking away my destiny down with a tall glass of lemonade  
 Red light stopped with detour the road blocked  
 Awaiting the circumstance to change to green  
 Hoping I could stumble into success  
 Without the humbling steps simply sitting in the back of the scene  
 It's time to operate from within the source of my entity's worth  
 My true identity star amongst the infinite sky  
 Through act projected from inside the conscience  
 With devotion and time tracked  
 Guaranteed dreams will get accomplished
